Sunaina Yaseen

SQA Engineer | QA Automation Engineer

Lahore, Pakistan · +92 320 1436593 · sunainayaseen561@gmail.com
LinkedIn: linkedin.com/in/sunaina-yaseen-160695277 · GitHub: github.com/Sunainayaseen

PROFESSIONAL SUMMARY

SQA Engineer with hands-on experience in **manual and automated testing** of web applications, built through a QA internship at **9D Technologies** and a current SQA role at **Softerio Solutions**. Skilled in writing test plans and test cases, automating UI regression with **Selenium WebDriver (Python + PyTest)**, **Cypress** and **Playwright**, validating REST APIs with **Postman**, and load testing with **Apache JMeter**. A full-stack development background (React.js, Flask, MySQL), including a solo-built production platform, means I understand how software is built, catch defects early, and write bug reports developers can act on immediately.

CORE SKILLS

Testing	Manual Testing, Requirement Analysis, Test Planning & Strategy, Test Case Design, Test Data Preparation, Bug Reporting & Tracking, STLC / SDLC
Testing Types	Functional, Regression, Smoke, Sanity, Integration, System, UAT, Exploratory, Cross-Browser, API, Load & Stress, Usability
Test Automation	Selenium WebDriver, PyTest, Page Object Model (POM), Data-Driven Testing, Cypress, Playwright
API & Performance	Postman, REST API Testing, JSON Schema Validation, Apache JMeter, Load & Stress Testing
Tools	Jira, Git, GitHub, Chrome DevTools, Vercel, Railway
Languages & DB	Python, JavaScript, SQL (MySQL)
Development	React.js, Flask, REST APIs, HTML5, CSS3, Bootstrap, LangChain, LangGraph, YOLOv8, OpenCV

PROFESSIONAL EXPERIENCE

SQA Engineer — Softerio Solutions, Lahore

2025 – Present

- **Design** test plans, test scenarios and test cases from requirements and user stories, with traceability to acceptance criteria.
- **Execute** functional, smoke, regression and cross-browser testing on web applications ahead of every release.
- **Automate** UI regression suites with Selenium WebDriver (Python + PyTest, Page Object Model), Cypress and Playwright.
- **Validate** REST APIs in Postman (status codes, payloads, schemas and negative cases) and run load tests in Apache JMeter.
- **Log, track and re-verify** defects in Jira, working closely with developers to resolve issues before release.

SQA Intern — 9D Technologies

Internship · 3 Months

- **Wrote and executed** test cases for web application features, reporting defects with clear reproduction steps, expected vs. actual results and screenshots.
- **Performed** functional, UI and regression testing ahead of releases as part of a live product team.
- **Learned** the full STLC and defect life cycle in a professional workflow, from requirement review to re-testing fixes.

Web Developer — remotebirdy.com

Remote · Project-based

- Developed full-stack features, integrated APIs and wrote technical documentation, building a developer's view of where defects originate.

QA PROJECTS

Selenium E2E Automation Framework

Tools: Selenium WebDriver, Python, PyTest, POM, pytest-html

- Built a Page Object Model framework with data-driven test cases and explicit waits that runs the full regression suite of a web app's core flows (login, forms, multi-step journeys) with one command.
- Added screenshots on failure and HTML reports so any team member can run the suite and read the results.

REST API Test Suite

Tools: Postman, JavaScript, REST APIs, JSON Schema

- Designed Postman collections with environments, chained requests and test scripts that assert status codes, response bodies and JSON schemas.
- Covered negative cases (invalid input, missing fields, boundary values) that UI testing alone had missed.

Cypress & Playwright E2E Suite

Tools: Cypress, Playwright, JavaScript, React

- Wrote E2E specs for a React SPA: Cypress for fast in-development feedback, Playwright for cross-browser runs on Chromium, Firefox and WebKit.
- Used network stubbing and reusable fixtures, with traces and videos captured on failure.

Load & Performance Testing with JMeter

Tools: Apache JMeter, SQL, REST APIs

- Built JMeter test plans with thread groups, ramp-up periods, CSV-driven test data and assertions.
- Analysed response times, throughput and error rates, and cross-checked slow endpoints with SQL queries to pinpoint bottlenecks.

FINAL YEAR PROJECT

GenSpark Builds — Agentic AI Platform for Custom PC Building & Assembly *Solo Project · BSCS*

GitHub: github.com/Sunainayaseen/GenSpark · Live: genspark-frontend.vercel.app

- **Built a YOLOv8 QA agent** that validates vendor-uploaded assembly photos against the ordered components before shipment approval, catching wrong builds before they reach the customer.
- **Designed a rule-based compatibility engine** with a self-correction agent that detects failed compatibility checks and automatically re-validates replacement parts.
- **Architected a multi-agent LangGraph/LangChain pipeline** (requirements → recommendation → budget → compatibility → vendor → QA) with RAG (FAISS/ChromaDB) over a live inventory of 90+ components in 12 categories.
- **Delivered 30+ REST APIs** serving 4 user roles (Customer, Vendor, Admin, Rider) and 20+ vendors, with order lifecycle and live rider tracking.
- **Shipped end-to-end to production**: React.js frontend, Flask/Python backend and MySQL, deployed on Vercel and Railway.

Tech Stack: React.js, Flask/Python, MySQL, OpenAI/Gemini API, LangChain, LangGraph, MCP, FAISS/ChromaDB, YOLOv8, Git/GitHub

OTHER PROJECTS

YOLOv8 Hardware Component Detection *Personal / Academic*

Real-time computer vision system that detects and classifies hardware parts (RAM, GPU, CPU, motherboard) from a live camera feed, using YOLOv8 (Ultralytics) and OpenCV.

Learning Management System (LMS) *Academic*

Full-stack LMS with student and teacher roles, course management, assignment submission, quizzes and progress tracking. React.js, Flask, MySQL.

Hospital Management System *Academic*

Patient records, doctor appointment scheduling, prescription management, billing module and admin panel. React.js, Flask, MySQL.

EDUCATION

BS Computer Science (BSCS) — University of Education, Lahore *2022 – 2026*

CERTIFICATIONS & TRAINING

- Full Stack Web Development with React & Node.js — Ideoversity Training Institute
- Building AI Agents & LLM Applications — Udemy (Python, LangChain)
- Prompt Engineering & Generative AI — Online Specialization
- Full Stack Software Development & Blockchain Technology Seminar — ZAI Systems (SMC-Pvt) Ltd, Lahore
